

Frida Svanberg

FRONTEND DEVELOPER

What I did

Frontend Developer @ Hakierka

February 2024 - Present

- Supported internal teams working with clients like Concordium, Protocol Labs, and Storacha by providing technical expertise and resources.
- Tested and reviewed product technologies to ensure quality and functionality.
- Created tutorials, demos, and documentation to support developer relations initiatives.

Frontend Developer @ Stryda

May 2022 - January 2024

- Started as an intern and was later hired to lead the intern frontend team.
- Held retrospectives, stand-ups, and wrote clear, actionable tickets to guide team processes.
- Ensured smooth communication between frontend and backend teams for successful project delivery.
- Built a React and TypeScript-based admin platform for the Business Intelligence team to enhance operational efficiency.

Frontend Developer @ Compodium

March 2021 - April 2022

- Contributed to the early development of Vidicue, a secure video conferencing and messaging app for healthcare and municipalities.
- Focused on building a secure and user-friendly frontend to meet strict requirements for sensitive communication.
- Wrote clean, efficient code and documented work clearly.

I did even more stuff on

Frida Svanberg

FRONTEND DEVELOPER

What I did before the other things

Developer @ Hygglo

February 2019 – February 2021

- Started as an intern and was hired after six months, quickly taking on significant responsibilities and honing my frontend skills.
- Served as the main developer for the admin platform, updating it to the latest version, improving functionality, and implementing creative solutions to streamline workflows.
- Collaborated with the marketing team to design seasonal campaigns like Christmas and Pride, while advocating for diversity-focused ideas to make the platform more inclusive.
- Developed for both web and mobile platforms, using Angular and React Native to create consistent and responsive user experiences.
